To Whom It May Concern:

Re: Antifreeze Registration for Period July 1, 2022 to June 30, 2023

You are receiving this letter because the Mississippi Chemical Laboratory (MSCL) currently lists you as a manufacturer or packager of antifreeze or engine coolant products sold in Mississippi. As detailed in § 75-56-9 of the Mississippi Code, any antifreeze or engine coolant must be registered with the State Chemist before July 1st of each year. Please find enclosed the application form that needs to be completed. Additional copies of the form may be obtained from MSCL's website: www.mscl.msstate.edu. When submitting a product(s) for registration, you are required to include the completed application form, a copy of the label for each product, and a certificate of analysis for each product that provides the basis for the labeled ingredients. If the certificate of analysis is from an independent laboratory, then it is able stand on its on merit. However, if the certificate of analysis is from an internal laboratory, then a copy of the accompanying data and testing methods must be provided with the certificate of analysis. If you cannot provide a certificate of analysis for a product(s), then you must also send a one (1) gallon sample of the product with the registration materials so that it can be analyzed to ensure it meets specifications. All registration materials must be received before the product can be registered. Please do not hesitate to contact me if you have any questions.

Sincerely,

Dr. J. Scott Boone
Director of Petroleum Products
